

## Silly Sounds

Children often imagine themselves as being a giant, a robot, or a fierce Lion. **Silly Sounds** brings this to life! We explore sound/voice using music technology.

### Silly Sounds involves

1. sing-song
2. voice recording
3. voice transformation
4. sound recognition & tone games

Finally, each child uses the microphone and rumbles the room with their **LOUD MONSTER ROAR!!** Afterwards, the children's **Silly Sounds** are then emailed to the teachers to use as a resource! **Silly Sounds** is loads of fun, linking music, technology, creativity, and voice.
