

## Jungle Fever

Children have a lively fascination with the Jungle!

So we wanted to accent that interest by building an interactive light & sound environment called **Jungle Fever**

### Jungle Fever involves

1. controlling animal light boxes
2. playing a light & sound sculpture called Luminescent Lilly
3. interacting with a computer program called Incy Wincy, making digital spiderwebs
4. children make a storm using jungle instruments

**Jungle Fever** makes connections between control, music, light, sound, and the jungle!
