

## Spark

**Spark** is a highly interactive show that introduces children to the concept of the electric forces. The central device in this show is a Van De Graaff Generator. This is a static electricity machine that has the power to move objects with no obvious physical connection.

### Spark involves

1. literally hair raising experiments.
2. creating little lighting bolts
3. demonstrating the motive power of the electric forces
4. children gaining a respect for electricity

**Spark** promotes inspiration, and the appreciation for this fundamental yet invisible force!!
